

River Parade North – climate coastal risk overview

While there are no risks rated as medium at this location, there is some minor inundation.

The inundation presents a risk to local environmental assets, particularly Otway Plain habitat (ecological vegetation class 992). Approximately 4.5 hectares will be inundated under the 0.2 m sea level rise scenario and this remains under the 0.5 and 0.8 m sea level rise scenarios.

There are no risks rated as medium or higher at this location.
